Wald, Ruhnke & Dost Architects' Misato Eddy Earns California Interior Design Certification

Monterey, CA – February 16, 2010 – Misato Eddy, who leads the Interior Design team of Central Coast architecture firm Wald, Ruhnke & Dost Architects, has earned her California Council for Interior Design Certification which qualifies her to be a “Certified Interior Designer” in the state of California. This certification is earned after the completion of required education and real-life work experience in the field, followed by the passing of the rigorous IDEX California[®] exam. The IDEX ensures that interior designers are current on California building codes, Title 24, design standards, including sustainability and green building codes, and industry ethics and business practices.

Wald, Ruhnke & Dost Architects' Interior Design team works with clients to help create business environments that reflect their vision and goals. The designs are practical, aesthetic, and customized for clients' intended purpose, such as raising productivity, selling merchandise, or improving work environments. The team offers a full spectrum of visual tools to help jumpstart the creative process, including 3D renderings, sketches and color boards. Interior design services also include programming, strategic master planning, space planning, and finish, furniture and fixture selection.

Recently completed Interior Design projects include the headquarters for Merrill Farms and Frisco Farms (Salinas); three projects for Salinas Valley Memorial Healthcare System: The Nancy Ausonio Mammography Center (Salinas), the lobby for the medical offices at 5 Lower Ragsdale (Monterey), and the medical facility at 355 Abbott Street (Salinas); and, the two-story atrium lobby at 307 Main Street (Salinas).
